

Brock's ACCESS PLUS® Hopper Access Door for easy ALL-OUT® bin cleaning

Brock's new ACCESS PLUS® Hopper Access Door makes it easy to clean out your feed bin from ground level. With this new Brock innovation, you no longer have to climb your bin and do aerial acrobatics to clean it. Instead, you simply open the ACCESS PLUS® door panel, clean out the bin's interior, and then close it. ACCESS PLUS® — it's another feature of Brock's next generation of feed storage bins and their innovative ALL-OUT® Feed Management System.

Brock's ACCESS PLUS® Door is conveniently located in the feed bin's hopper to give you easy, ground-level access to the interior of your feed bin. With the simple removal of a few "T"-handle bolts, the door panel for the ACCESS PLUS® lifts out so you can begin the interior cleaning process now being required in some industry sectors.

The opening of Brock's ACCESS PLUS® is wider at the top than it is at the bottom. This allows a man to comfortably work in cleaning out the feed bin. When cleaning chores are completed, simply replace the door panel and the bolts. The ACCESS PLUS® door panel also features a rubber-like seal to re-seal the hopper opening after each use.

Product Leadership™ for a New Feed Storage Standard
