

Brood Grow System

Choose Chore-Time
For The Complete
Pullet Systems Package

Cages That Set The Standard

Chore-Time's Manure Belt Cage System for pullets features a new cage front which promotes better bird uniformity, allows faster weight gain, and saves labor for the producer by allowing all feed access adjustments for all lines to be made from a remote location in the house. This conveyor belt system also features easier manure handling. A dropping board scraper model is available as an alternative.

Features:

- Cage front design features labor-saving feed access adjustment.
- All galvanized steel construction and exclusive GALV-A-WELD wire mesh.
- One-inch (25-mm) square wire mesh.
- More total usable floor space because feeder is outside the cage.
- Choice of 3-high or 4-high configurations.
- Bird comfort: 16-inch or 18-inch (406- or 457-mm) cage height in most models.
- Easy access doors that close securely.

Benefits:

- Built to last – a long-term investment.
- 10-year prorated warranty.
- Better bird uniformity.
- Better bird livability.
- Lower operational costs.
- A healthy environment for pullets.
- Easy visibility of birds in all tiers.

See page five for cage specifications and manure belt information.

A Dependable Drinking System

Chore-Time's nipple drinkers are easy to adjust and easy to use. This streamlined system helps simplify management for producers. Keep your birds in the flow with Chore-Time.

Features & Benefits:

- "Straight-through" design allows lines to be completely flushed – no dead-end hoses.
- Automatic flush capability.
- Drinkers are adjustable from a few inches off the floor to the top of the cage.
- Winch system allows central adjustment of drinker height.
- Pre-assembled of all plastic and stainless steel parts.
- 360° trigger action.

TURBO-Charge Your Air System

Comfortable birds are healthier and grow better. Chore-Time's air systems and heaters can help. We have everything you need to "TURBO-charge" your environmental control.

TURBO® Fan Features & Benefits:

- Fiberglass housing and cast-aluminum blade.
- Superior air flow and efficiency.
- One-piece cone improves air flow up to 10%.
- Corrosion-resistant plastic shutter also available.

TURBO-COOL™ Evaporative Cooling System Features & Benefits:

- Continuous one-piece, non-corrosive trough.
- Self-contained water storage – no external tank.
- High-performance, six-inch thick cooling pads install and remove easily.
- Open top design provides easy access for cleaning.

CHORE-TRONICS® Controls Features & Benefits:

- Easy-to-operate and includes digital output.
- Temperature and minimum ventilation ramping.
- Computer compatible.
- Controls all house ventilation components.
- Selectable fan performance curves.
- Optional staging, timers, alarms and lock switches.

DURA-THERM Heater Features & Benefits:

- Designed for durability.
- Full 1/3 HP motor for maximum output and longer life.
- Grower-friendly operation.

TURBO® Air Inlet

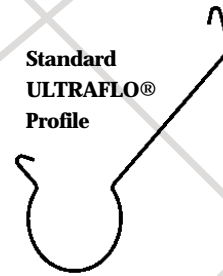

The Preferred Pullet Cage Feeding System

Chore-Time's ULTRAFLO® Feeder is the best way to feed caged birds from day-old through grow-out. It performs reliably year after year, delivering feed uniformly throughout the house.

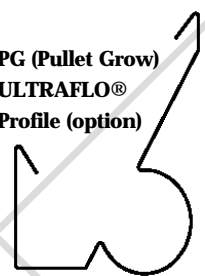

Features & Benefits:

- Dependable microprocessor control.
- Unique auger connector.
- Recirculating auger insures fresh feed is always available to all pullets.
- Closed loop feeder safely delivers fresh feed.
- Lowest maintenance of any feeder available today.

The Best Way to Manage Your Feed

Chore-Time's ALL-OUT® Feed Management System provides the latest technology in feed storage and handling and added biosecurity, convenience and efficiency features.

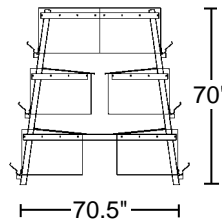

Features & Benefits:

- Patented features help keep moisture out and ease bin filling and cleaning chores.
- Simplified cleaning and remote bin opener location aid in biosecurity.
- Includes the best system ever devised to convey feed – Chore-Time's Famous FLEX-AUGER® System.
- Chore-Time feed screener removes foreign objects and clumps of bad feed.
- Digital feed bin scale for accurate feed inventory includes LCD display and power failure protection.

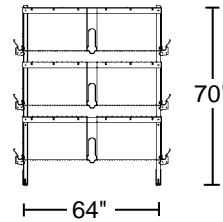

Brood-Grow Cage System Specifications

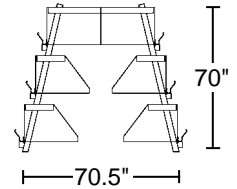

CHORE-TIME'S PULLET CAGE Systems are the standard of the industry. We offer a choice of 3-high or 4-high systems, 24- or 30-inch (610- or 762-mm) cage widths, and a variety of cage depths. Ideal for new construction or remodeling, our pullet cages are available in many different configurations to fit your management plans.

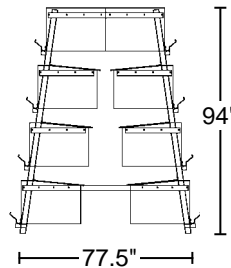

3-High Dropping Board

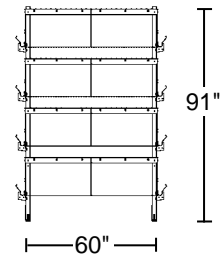

3-High Manure Belt

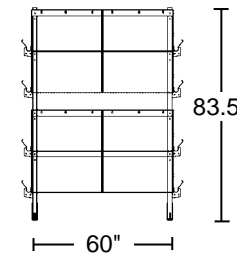

3-High Curtain Back

4-High Dropping Board

4-High Manure Belt

4-High 2+2

TURBO® Scrapper also available for high rise houses.

Superior Manure Handling

Chore-Time's Manure Belt System is self-cleaning and offers exceptionally good tracking for years of smooth operation and extremely manageable manure. An optional air drying system is also available.

Manure Belt System Features & Benefits:

- Belt is made of durable, easy-to-clean, polypropylene with ultraviolet inhibitors.
- Each tier has a separate drive unit with its own low horsepower motor and can be operated independently of the others as needed.
- Modular construction makes Chore-Time's UNIDRIVE® System easier to install. Plus, parts are interchangeable between tiers.
- Solid steel drive roller is coupled with rubber-coated snub rollers – a combination that allows reliable belt operation on cage row lengths up to 500 feet (150 m) and longer.

- Simplified drive and idler units have heavy-duty drive shafts and greasable bearings.
- Belt tightness and tracking can be manually adjusted on either side of cage row.
- Galvanized side rails help keep belt aligned and tracking properly.
- Plastic belt scraper cleans belt without cutting or damaging it.

Optional Manure Drying System Features & Benefits:

- Supplemental high-capacity air tube is made of the highest quality materials for long life.
- Meets today's standards for reduction of ammonia emissions.
- Exhaust air is purified and virtually dust-free.
- Modular components provide flexibility in design and output.

SMARTSM Systems Work Together

Chore-Time's complete cage systems are designed to work as a SMART System. Getting all the components from Chore-Time means they will all fit and work together. Service and warranty coverage come from one source too. To get the Chore-Time SMART Advantage for your farm or complex, why not contact us today?

The Chore-Time SMARTSM Advantage

Single source for system supply and service

Maximum return on investment

Advice from knowledgeable staff and distributors

Reliable operation for years of dependable service

Technical support and solid corporate backing
